Quantitative Reasoning/Data and Analytical Methods Field

Why do HDO majors take data-focused courses?

To study people in groups, you need to know *how* to study people in groups. A foundation in quantitative reasoning is a key component in thinking critically about data and how it can be used to drive change. These types of courses aim to teach students about collecting and analyzing data that involve statistical analysis. These courses involve the development of surveys and experiments; basic statistical analysis; econometrics; and computational methods.

Qualitative Reasoning field:

Why do HDO majors take qualitative courses?

Qualitative reasoning is a key way of studying people as individuals and groups. These courses help you learn the most reliable ways of collecting and analyzing people-centered data such as opinions, feelings, and viewpoints. They are meant to enhance your understanding of gathering information about people as they function in groups, cultures, and organizations. These courses introduce students to data gathering methods including observation, ethnography, interviews, history, etc.

Creativity and Innovation field:

Why do HDO majors take creativity courses?

We know that the disciplines in the liberal arts enhance creative thinking and the generation of new ideas. These courses require students either to think in new ways about personal and organizational dynamics or to study how organizations promote the development of new ideas. Classes may focus on theater, creative writing or the arts or may study the way individuals, groups, and cultures can generate, evaluate, and implement new ideas.
