Quantitative Reasoning/Data and Analytical Methods Field

Why do HDO majors take data-focused courses?

To study people in groups, you need to know *how* to study people in groups. A foundation in quantitative reasoning is a key component in thinking critically about data and how it can be used to drive change. These types of courses aim to teach students about collecting and analyzing data that involve statistical analysis. These courses involve the development of surveys and experiments; basic statistical analysis; econometrics; and computational methods.
